

IT Employment Declines in March as Demand Varies Widely Across Geographies and Sectors

Alexandria, VA, April 11, 2023 – IT Jobs declined 0.29% month-over-month in March, according to TechServe Alliance, the national trade association of the Technology Staffing and Solutions Industry. On a year-over-year basis, IT employment was down 2.1% from March 2022, a net of 114,800 jobs. The Engineering sector showed a year-over-year job growth rate of 3.06% with the addition of 82,500 jobs during the year.

“As expected, overall IT employment continued to slide in March as some geographic markets and industry sectors retrench after over hiring during the pandemic and in its immediate aftermath. While the IT unemployment rate rose from 2.1% in Q4 of 2022 to 2.7% in Q1 reflecting this softening of demand amidst economic uncertainty, it remains well below the

level deemed full employment,” said Mark Roberts, CEO of TechServe Alliance. “As I have noted previously, there is no single narrative that accurately describes the current market. While some sectors have engaged in layoffs that include tech workers, demand for many skill sets remains strong with IT professionals being redeployed to other industries,” added Roberts.

The following table presents information about the total number of jobs in certain sectors that provide a significant amount of employment for IT and engineering professionals.

Comparisons of TechServe Alliance's IT Employment Index to employment in some key sectors with significant numbers of IT jobs as well as to all non-farm jobs									
March 2023	TechServe Alliance IT Employment Index	Computer systems and design services	Management and technical consulting services	Data processing, hosting and related services	TechServe Alliance Engineering Employment Index	Computer and electronic product manufacturing	Professional and technical services	Federal, State, and Local Government (excluding state and local schools and hospitals)	Total non-farm jobs
number of jobs	5,345,400	2,487,500	1,858,500	482,600	2,781,100	1,099,500	10,779,00	11,023,900	155,569,00
change from previous month	- 0.29%	+ 0.1%	+ 0.4%	+ 0.2%	+ 0.14%	- 0.2%	+ 0.2%	+ 0.2%	+ 0.2%
change from same month, one year earlier	- 2.10%	+ 2.5%	+ 5.7%	+ 7.7%	+ 3.06%	+ 2.2%	+ 4.0%	+ 1.9%	+ 2.7%

Technical note: TechServe Alliance's IT Employment Index and Engineering Employment Index are the first specific measurements of IT and engineering employment. These unique measurements of total IT and engineering employment are created monthly by studying the ongoing staffing patterns of a dozen IT and computer related occupations in 22 industries and industry sectors employing significant numbers of IT workers and nearly two dozen engineering occupations in 30 select industries and industry sectors employing significant numbers of engineering workers. Both the monthly IT Employment and Engineering Employment Indices are based on U.S. Bureau of Labor Statistics (BLS) data, which is subject to monthly revisions. The indices are also subject to annual revisions and rebenchmarking and may incorporate new occupational definitions. The most recent rebenchmarking took place with the dataset utilized in this February 2023 release.

About TechServe Alliance

TechServe Alliance is the national trade association of the IT & Engineering staffing and solutions industry. IT & Engineering staffing and solutions firms count on TechServe Alliance to keep their leadership informed, engaged, and connected. TechServe Alliance serves as the voice of the industry before the policymakers and the national and trade press. By providing access to the knowledge and best practices of an entire industry and tapping the "collective scale" of its members, TechServe Alliance supports its members in the efficient delivery of best-in-class IT & Engineering staffing and solutions for clients and exceptional professional opportunities for every consultant.
